ABOUT

I am a software developer eager to share her passion for technology-based entertainment such as games and animation. Sharing my unique perspective and ideas with others drives me to bring innovation to digital products. It's this satisfying and rewarding process that makes me want to challenge myself and enables me to push my limits as a software developer to fill this world with joy!

EXPERIENCE

Full Stack Software Engineering, General Assembly — Full-Time Student

July 2020 - October 2020

- 500-hour full-time and full-stack program conducted in a remote setting
- Learned and got experience with the latest both front- and back-end programming languages, tools, and methodologies
- Developed a portfolio of individually and collaboratively focused in-class projects

Kumon Math and Reading Center, Kumon — Assistant Teacher

May 2018 - PRESENT

- In addition to correcting students' work and planning assignments, tutored over 550 struggling students individually and in small groups to reinforce learning concepts.

Private Japanese Tutoring

June 2016 - August 2018

- Worked with students in order to complete assignments from Japanese Saturday school every week (up to the level of 6th grade), and prepared materials for better understanding.

EDUCATION

Full Stack Software Engineering, General Assembly — Full-Time Student
